

Integrated Laser Systems, Inc.

170 Laser Lane, Summerville, Ga. 30747

Introducing the latest laser cutting technology

Thor SERIES

ILS has taken all that it has learned over the past twenty years and applied it to building the most technologically advanced laser cutter our industry has ever seen. Available in 10w to 200w, With three size formats 18"x24, 36"x36" and 36"x60", we have a machine for any application. These machine are capable of Vector, and Raster Cutting. All have a Powered x-y & z axis for cutting or Engraving Large or tall items. With the introduction of the Thor Series we no longer have to make the customer fit the machine. We now make the machine fit the customer.

More Options:

ILS has added more options to our standard machine. The new Thor & Aegis Laser Cutters offer USB Communication for high speed transfer of data. All machines offer water or air cooling. We also offer Rotary Attachments for engraving cylindrical objects.

Ils has moved to the forefront of the laser cutting industry, with all types of laser cutters. We have roll feed, flatbed, Shuttle bed, and custom engraving lasers. We are ready to fill any application you may have. We can read all standard drawing formats and Tajima embroidery files.
